

Green Eggs and Ham Breakfast

•Friday, July 23rd•

•8:00 a.m.•

•Radisson Hotel in Greentree•

101 Radisson Drive
Pittsburgh, PA 15205

Regular Price:	\$50.00
ABC Member Discounted Price:	\$40.00

Join us for this informative seminar to discuss Green Building and the effects on the Pittsburgh Market and hear from Christian Klehm, President of Energy and Environmental Solutions, a Pittsburgh-based consulting firm.

Chris is known throughout the country and overseas as an inspirational speaker and teacher on Sustainability, LEED, Construction Best Practices, and Sustainable Building Design and Construction Technologies. The author of the USGBC's "LEED for General Contractors and Construction Managers," Chris's project experiences range from sustainable home design to the largest construction and commercial projects ever undertaken. Chris has been working with the USGBC LEED program since the first pilot projects in 1997 and to date has completed over 40 million square feet of LEED Projects

Chris provides a comprehensive prospective and offers 25 years experience as a commercial general contractor. While owning his own firm for 15 years, Chris served as the head of the General Contractors Council for Associated Builders and Contractors (ABC) of Western Pennsylvania and earned the ABC's honor of General Contractor of the Year for two consecutive years. His firm also won numerous design and construction awards, including several AIA COTE Top 10 Awards.

Be sure not to miss this event!

Christian E. Klehm, LEED AP, ASME, LEED Faculty

President, Energy & Environmental Solutions

About Chris

Chris Klehm is President of Energy & Environmental Solutions, a sustainability and green building consulting firm with offices in California, Nevada, Missouri and Pennsylvania. A recovering general contractor, Chris has 30 years experience in green building, construction and consulting. He has been an active member of the USGBC since 1996 and is a member of the USGBC LEED Faculty. He is known throughout the country and overseas as an inspirational speaker and teacher on Sustainability, LEED, Construction Best Practices and Sustainable Building Design and Construction Technologies. The author of the USGBC's "LEED for General Contractors and Construction Managers," Chris's project experiences range from sustainable home design to the largest construction, and commercial projects ever undertaken. Chris has been working with the USGBC LEED program since the first pilot projects in 1997.

About E2

E2 is a consulting firm that helps organizations align business goals with sustainable solutions. At e2, Chris is responsible for strategic planning and analysis on LEED and green building projects as well as product development with manufacturers. He also oversees business development and client management. The firm's specialized team of architects, engineers and business analysts work collaboratively with Building Owners, Contractors, Product Manufacturers, Municipalities and their teams to create high performance green buildings, products, programs and companies that cost-neutralize the LEED and green-building design process and achieve environmentally responsible developments.

Experience and Philosophy

Chris was the first graduate of CCAC's Alternative Energy Technologies Program and was the Research Director for the CCAC Passive Solar Test Laboratory from 1982-84. He provides a comprehensive perspective and offers 25 years experience as a commercial General Contractor, having owned his own firm for 15 years. During that period Chris served as head of the General Contractors Council for the Western Pennsylvania Chapter of the Associated Builders and Contractors (ABC), earned the ABC's honor of General Contractor of the Year two years in a row as well as numerous design and construction awards including several AIA COTE Top 10 Awards. He is the founding chair of the Pittsburgh Green Building Alliance, serving as the Chairman of the Steering Committee and Advisory Board from 1997-1999.

Chris's focus is on continual development of systems thinking approach to enable managing projects for consistent results, corporate sustainability initiatives, and large-scale LEED building projects. Chris facilitates design charrettes and acts as integrative design coach on projects, insuring that project goals are clearly articulated and executed. The e2 corporate headquarters, as well as Chris's home are model examples of fully integrated, low-impact sustainable projects. The E2 team has over 50 LEED projects under their belt amounting to over 40 million square feet and \$14 billion in construction costs.
